PROFESSIONAL SUMMARY

Senior Mechanical Design Specialist with over 4+ years of hands-on experience in **parametric CAD modeling** and complex assembly creation. Proven track record of bridging the gap between design intent and manufacturing reality through deep expertise in **DFM, GD&T (ASME Y14.5)**, and **manufacturability analysis**. Adept at building **robust feature trees** and precise constraints for **injection molding, sheet metal, and CNC-machined** components. Combines a strong engineering background with advanced **reverse engineering** capabilities (Scan-to-CAD) and workflow automation via **Python** and **VBA**. Seeking to leverage deep mechanical design knowledge to train next-generation AI systems at microl.

CORE COMPETENCIES

- Parametric CAD Modeling: SolidWorks (Professional), Fusion 360, Autodesk Inventor.
- Manufacturing Methods: Injection Molding, Sheet Metal Design, CNC Machining, Casting & Forging.
- Design for Manufacturing (DFM): Part consolidation, Draft analysis, Wall thickness optimization, Bend allowances.
- Drafting & Tolerancing: GD&T (ASME Y14.5), Tolerance Stack-ups, Geometric Dimensioning, Surface Finishes.
- Data Management: Feature Tree Management, Design Documentation, CAD Editing, Project Documentation.
- Reverse Engineering: Scan-to-CAD workflows, Point cloud conversions, Surface reconstruction.
- Automation: Python, iLogic, VBA, Design Tables, DriveWorks.

TECHNICAL PROJECTS

Automated Design System for Consumer Electronics (Python & iLogic)

- Developed an automated parametric modeling system that generates custom enclosures based on dimensional inputs (length, width, height, wall thickness). This script calculates draft angles, adds ribs and bosses for injection molding, and outputs fully constrained files ready for tooling.

Solar-Powered Cowpea Thresher

- Designed 150+ component parametric assembly with robust feature trees, design tables, and GD&T per ASME Y14.5
- Optimized DFM for injection molding, sheet metal, CNC machining, and casting—reducing part count 28→12
- Validated via FEA (stress/modal analysis, SF=2.0) and automated workflows using Python/iLogic (40% time savings)
- Achieved 70% labor reduction, 12% grain damage improvement, and eliminated diesel dependency

EDUCATION

B.Eng Mechanical Engineering
Federal University Oye-ekiti
2022–2026

Certifications

- CSWP (Certified SolidWorks Professional) – Dassault Systèmes

ADDITIONAL SKILLS

- **Software:** SolidWorks, Fusion 360, Autodesk Inventor.
- **Analysis:** FEA Simulation (SolidWorks Simulation/ANSYS), Tolerance Analysis.
- **Languages:** English (Fluent – Written & Verbal).
